SFX Constant Pressure System

SFX cistern pumps are constant pressure units suitable for both continuous and intermittent operations in a variety of applications, including domestic water supply, small waterworks, irrigation, tank applications, pressure boosting, and more.

The 4" SFX pump is sold as a kit and consists of a stainless steel 4" submersible pump with a high-speed submersible motor. It also includes a constant pressure controller, which features a variable-speed drive, flow detection, and a pressure

Features:

- Constant pressure/variable speed
- Designed for higher pressures
- Includes all stainless steel fittings required for assembly.
- Provides 40-50% power savings over traditional systems.
- 60Hz single-phase drive mounted on a plywood board.
- Includes 20 feet of 12/3 submersible wire.
- Includes 20 feet of 1" clear braided hose.
- Operates at 220 volts with a pump and controller.
- Compact design for small space operations
- 1 horsepower, 230 volt, 2 wire, single phase pump
